found in the previous box and so on forming a chain This strategy gives the prisoners a surprisingly high 30 chance of survival 5 Imagine you have a 10story building and you want to find out the highest floor from which you can drop an egg without breaking it You have two eggs What is the optimal strategy to minimize the number of drops Approach This classic problem involves a balance between minimizing the number of drops and maximizing the information gained from each drop Solution The optimal strategy is to start by dropping the first egg from the 14th floor If it breaks you know the highest floor is between 1 and 13 You then use the second egg to check each floor from 1 to 13 requiring at most 13 more drops If it doesnt break you move up to the 27th floor 13 more floors Continue this pattern increasing the interval by one less floor each time until you reach the top or the egg breaks Remember Its Not About the Answer Its About the Process 4 Interviewers arent looking for a textbook answer They are interested in your problem solving process your thought process and your ability to communicate your approach Articulate Your Reasoning Explain your logic clearly and concisely Use examples to illustrate your points Ask Questions If youre unsure about something dont hesitate to ask for clarification Stay Calm Its easy to get flustered under pressure but try to remain composed and focused By practicing understanding the purpose behind these questions and applying the right strategies you can confidently navigate the world of brain teasers and impress your potential employer After all a little bit of brainpower can go a long way
